

## Game Title: **Guess the Number**

**How to play:** Think of a number between 10-30. Get your partner to ask you questions 'is your number bigger than...', or 'is your number smaller than...' and move the pegs to show which numbers have been eliminated. When you have only 3 or 4 numbers left between the pegs your partner is able to guess which number is the mystery number. Swap roles and play again!

**Resources included:** number line template, 1 instruction card.

**Resources needed from home:** 2 clothes pegs.

**Key skills involved in this game:** Say the number that comes before or after a given number. Remove a smaller number from a larger and find how many are left by counting back from the larger one.

**Vocabulary/key questions to ask:** is your number bigger/smaller than?

**Extra for experts:** Place your peg on a number. Get your partner to tell you how many to take away (between 0-5). See if you can count backwards to subtract that number and find the answer.

*We hope you enjoy playing the game with your child.*
