

## Scientists

Sir David Attenborough – Born 1926

### Links to prior learning and next steps:

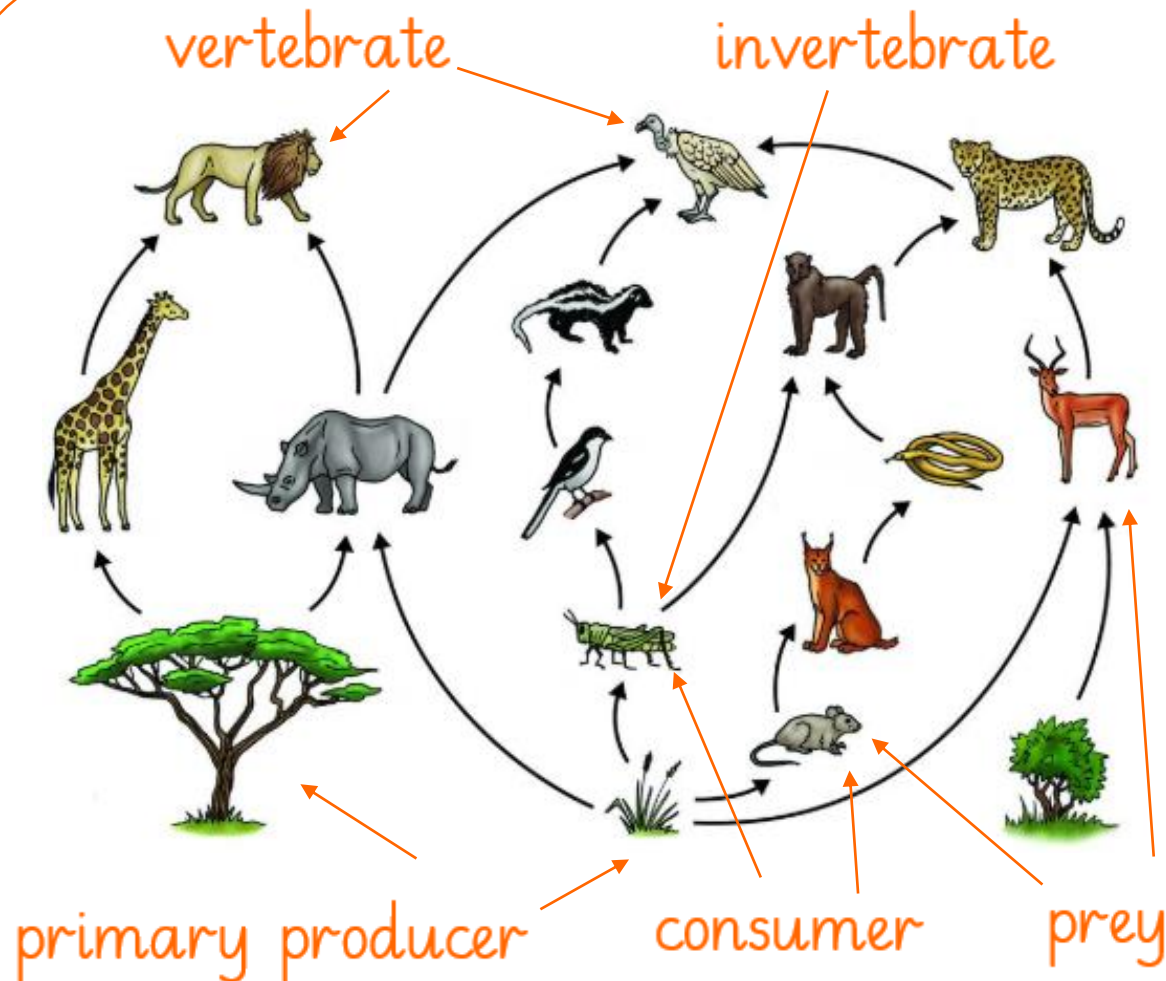

Animals and plants (Y1, Y2, Y4 and Y6)

### Links to other subjects:

English – writing an information text  
Maths – statistics and presenting data in a table

# Biology

## Science Y3: Living Things and Their Habitats

### Vocabulary

**organism** a living thing

**habitat** the place where an organism lives

**environment** the surroundings or conditions where an organism lives

**vertebrate** an animal that has a backbone

**invertebrate** an animal that does not have a backbone

**consumer** an organism that feeds on plants or other animals

**producer** an organism that produces its own food (e.g. plants)

**primary producer** organisms that make their own food from sunlight and are the base of a food chain

**prey** an animal that is eaten by another animal

**predator** an animal that hunts other animals

**interdependence** where organisms in a habitat rely on each other and their habitat to survive

**ecosystem** the living things in a habitat plus the habitat itself
