

Autumn Tree Handprint

You will need:

- Brown, yellow, orange and red paint
- 3 corks
- Paper
- Paintbrush

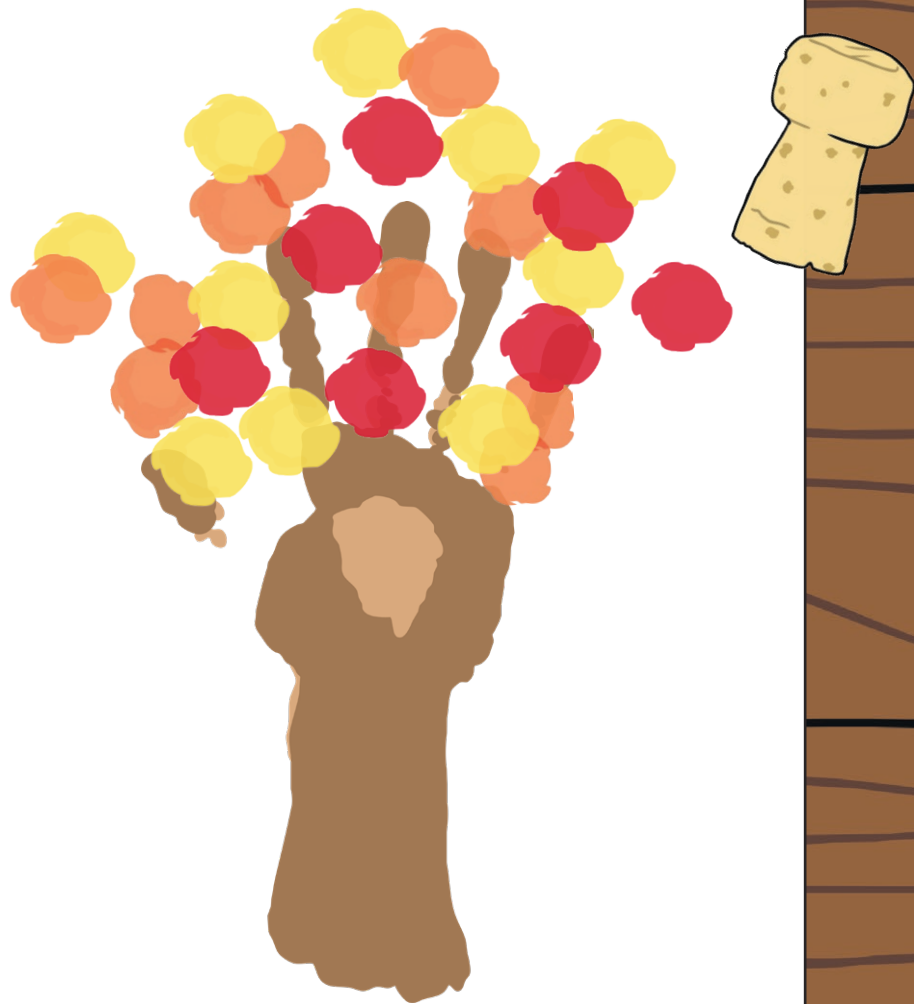

Step 1

Use the brown paint to print a handprint onto the paper, with the fingers spread out to make the branches of the tree. You may wish to use the brush to create a tree trunk.

Step 2

Carefully dip a cork into one of the colours of paint and use this to print leaves onto the branches of the tree.

Step 3

Repeat this with the remaining colours of paint, making sure to spread the different colours around all of the branches of the tree.

Step 4

Leave the paint to dry.
