Tim Berners Lee
1955 - now

History of Technology

History Y1

Computers were originally just for maths. They have changed over time to do more things. They are smaller now and more powerful. Computers and technology have changed how we live today.

Telephones were originally just for phone calls. They have changed over time to do more things. They are smaller now and more powerful. Phones have changed how we live today.

Tim Berners Lee invented the world wide web. He went to school in East Sheen.

Grace Hopper was a computer scientist, She was important in developing code that computers could read.

Elizabeth I
1533-1603

Victoria
1819-1901
